Media Release

Transtar Corporate Video

We are in the business of integration and change

Transtar is proud to release the updated version of our corporate video that includes new footage of our teams in Asia, the warehouse facility in Sydney and everyone’s favourite security pooch. To view the video, click on: <http://www.transtar.net/news-and-media/media/transtar-corporate-video>

“Unlike most Australian international freight and logistics companies, we have Transtar offices with Transtar people on the ground, handling your cargo, end to end. This is our Asia Direct promise.”

“We are also strategically located in 10 of the top 12 container ports of the world, answering all your shipping requirements around the globe and around the clock.

By cutting out the middle man, this allows us to deliver upstream supply chain initiatives with proven results.

Our vision is to be the leading private company provider of freight and logistics services in the Asia-Pacific market”.
